Throughout your lifetime you may have been searching for quality solutions for a healthier lifestyle. Whether you've struggled with health issues, or just enjoy improving your quality of life, a valuable product always seems to be in the forefront of healthy living. What if you could find that one supplement to change your entire outlook on life? Now you can make the change with **Citrus Bergamot**, the powerful fruit offered by **HP Life Science**. With the ability to support healthy cholesterol, blood glucose, Triglycerides and blood pressure, Citrus Bergamot could be the long-anticipated answer. Originated in the tiny region on the southern coast of Italy, Citrus Bergamot is a powerful citrus fruit that brings extraordinary results.

Powered with antioxidants such as Flavanoids, Citrus Bergamot helps to lessen chemical reactions in the body that damage cells---which aids in the protection of the body's cells from harmful free radicals for optimal long-term health. Flavanoids are polyphenolic compounds that are found in plants, and also play a key role in managing inflammation within the arteries, and helps produce a healthy body for the long haul.

A quality fruit indeed, HP Life Science's Citrus Bergamot aids your body by blocking enzymes needed to help and control cholesterol production---giving you the ability to improve general wellness. Flavanoids will stimulate glucose transporter proteins and glucose-regulating enzymes, which will help regulate blood sugar levels effectively, and provide quality health throughout your lifespan.

Citrus Bergamot's ability to manage insulin sensitivity plays a contributing factor in maintaining healthy glucose levels, which aids in controlling proper body weight for optimal long-term health. This natural fruit is also packed with a potent bioflavonoid called Naringin, a valuable compound that also impacts cholesterol levels, and triglycerides.

"One study found that Naringin was able to lower LDL cholesterol levels by 17%, and total cholesterol by 14% by patients struggling with cholesterol." This indicates that Naringin helps to improve overall cardiovascular health, and allows for a fruitful and happier lifetime experience. In the International Journal of Cardiology, a month-long study was conducted involving 77 participants that consumed 1,000 milligrams daily of Citrus Bergamot. The study found that this powerful substance lowered cholesterol from an average of 278 milligrams per deciliter of blood to 191.

In another trial involving rats, it demonstrated Citrus Bergamot's influential impact on hypolipidemic properties. The rats consumed 1 ml a day of Citrus Bergamot, and managed to lessen serum cholesterol, triglycerides, and low-density lipoprotein (LDL) levels. In addition, Citrus Bergamot helped to increase high-density lipoprotein (HDL) levels. Furthermore, fecal neutral sterols and fecal bile acid excretion was improved due to the intake of Citrus Bergamot.

With its ability to promote healthy cells, this powerful fruit can lead to quality living and increased longevity. According to phytotherapy research, a study was done to examine the effects against hypercholesterol diet-induced renal injury in rats. Citrus Bergamot managed to maintain appropriate plasma levels of cholesterol, triglycerides and LDL---and elevated HDL levels---paving the way for healthy bodily functions. The antioxidant properties in Citrus Bergamot were analyzed by two vitro systems, and it demonstrated positive effects. In the DPPH test, it showed an ability to help combat free radicals (1C50-25.01 I 0.70ml). In addition, in the reducing power assay, it showed positive effect as well (1.44 +- 0.01 ASE/ml).

It suggests that with its powerful antioxidant properties, Citrus Bergamot plays a key role in hypercholesterolemic diet-induced renal damage---which promotes a healthy heart and maximizes long-term productivity. "In one stunning clinical trial, researchers uncovered the true power of Bergamot Polyphenolic Extract(BPF). This 30-day placebo-controlled interventional study included 28 patients, all of whom had high cholesterol, and some of whom also had high blood sugar. At the end of 30 days, most of the patients in the BPF group had substantially lower total cholesterol---up to 38% lower! And their LDL cholesterol plunge was just as impressive, with an average 37% drop."

This potent substance is also vital for neuroprotection, as its ability to lessen cell death helps to control neuronal damage---resulting in better brain health, which allows you to complete daily tasks quickly and effectively.

HP Life Science's Citrus Bergamot is an effective formula to control many of life's toughest health challenges. In order to continue progressing with a satisfying lifestyle, you have to take chances. HP Life Science brings you an impactful research-based product for maximum, quality living. Now you can take a chance on Citrus Bergamot---a powerful and proven solution to bring you fast, effective results.
