

HIGHLIGHTS

- > Unique blend of protein, carbohydrates, amino acids
- > Maltodextrin for increased energy
- > Powerful Blend of Glutamine and Creatine
- > Low in fat
- > Accelerates recovery

RESEARCH INDICATES

- > Specifically made for fast metabolisms
- > Increases muscle mass
- > Enhances energy

- SUPPORTED GOALS

THE MUSCLE-BUILDING FORMULA FOR FAST METABOLISM WOES
 Most bodybuilders work to keep the weight off... but not you. You have a fast metabolism and that has unique challenges. What if you could build muscle mass quickly and overcome fast metabolism woes? Packed with Whey Protein, Maltodextrin, Glutamine, and Creatine, Premium Weight Gainer is your answer. Our all-in-one supplement for bodybuilders with high metabolism, Premium Weight Gainer lives up to its name and provides massive muscle gains, no matter how fast your metabolism runs.

Improve Lean Muscle Mass
 Premium Weight Gainer contains Glutamine which builds muscle quickly by helping preserve muscle tissue—resulting in fat loss. With its powerful amino acids, Premium Weight Gainer helps repair muscles to enhance lean muscle growth. Premium Weight Gainer includes Whey protein, which has Lecine, an amino acid found in dairy products to help increase stamina, so you can work out as long as you need to, and meet your desired goals.

Increase Muscle Mass Weight
 Creatine is a powerful substance that contains high-energy phosphate known as Phosphocreatine, which creates ATP. Creatine bolsters the rate of ATP, and helps train your muscles harder and build muscle at a faster rate. It also increases cell volume and causes rapid muscle growth, resulting in increased muscle mass weight.

Sustained Energy for Enhanced Results
 Maltodextrin is an artificially produced long chain carbohydrate, which breaks up into medium length molecule chains. For this reason, Maltodextrin is considered a "high complex" carbohydrate that provides sustained energy to enhance performance.
